i Note on operation with drinks containing protein (e.g. hot chocolate):
The maximum permissible processing temperature for the drink may not be exceeded under any circumstances. This depends on the particular manufacturer. "Burning" must be strictly avoided to protect the machine. The "medium temperature setting" on the machine should not be exceeded. We recommend the use of hot chocolate which can be heated to max. 85 °C (including www.naarmann.de). Daily cleaning with OTHG fit PROFIL in accordance with DIN 6650-6.

* Price (EUR) is sales price without any quantity-based discounts and do not include VAT, packaging and shipping costs. Sale exclusively to commercial end users. Subject to changes and errors.
